

Renewable Energy Demonstration Trailer

Creating a Sustainable Future for Gippsland

In partnership with AGL the GCCN RED Trailer program promotes renewable energy options and raises new energy awareness at schools, community events and festivals across Gippsland.

This partnership has enabled the RED Trailer to be refurbished to include recent new energy technologies and to develop the support of educational opportunities.

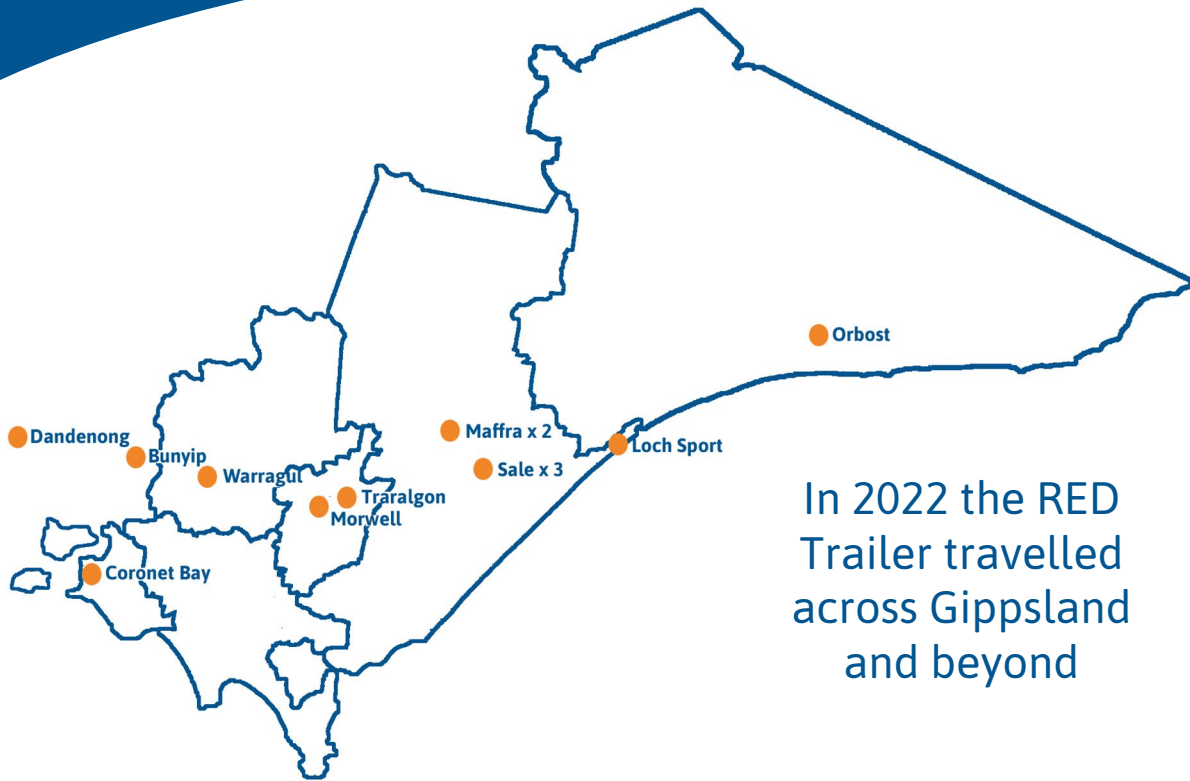

GCCN is committed to continue building this relationship with AGL including a focus on student engagement by working towards a dedicated education program.

Housed undercover in a secure location at TAFE Gippsland Yallourn campus, in 2022 the RED Trailer travelled 2,245kms to 13 venues across Gippsland and beyond. A total of 2,650 people attended these venues including schools festivals, markets, open days and conferences.
